

**City Partnerships to Improve Outcomes for Deep End Youth
 Workplan for Juvenile Justice Stakeholders**

Initial recommendations for city leaders:

- *Get to know the local landscape of initiatives, relevant structures and key players better.*
- *Commission a data analysis to provide a basic understanding regarding numbers, trends and makeup of the juvenile justice-involved population.*
- *Undertake an analysis of local assets and gaps for providing services and supports to deep end youth.*
- *Analyze the extent to which any current resources and services target or incentivize participation of deep-end youth.*
- *Undertake city-level planning to build on assets and fill gaps in services and supports commensurate with needs and to set goals for better youth outcomes based upon increases in pro-social activities and behaviors.*

Estimated % of youth in the local juvenile justice system who reside in municipalities	
--	--

Highest prevalence of deep end youth by geography	Zip Codes
youth experiencing homelessness and criminalization	
youth returning from detention or placement	
youth at risk of detention or placement
